TO THE EDITOR OF THE NEW YORK HERALD.—IN
Your issue of Sunday I observed that my name had been
placed on the ticket of the anti-Maine law temperance party
as a candidate for the office of Governer. Since that time I have
daily expected an official announcement of the same, but as
such has not yet appeared I feel that I am called upon to make
the following declaration:—That I never have had anything
to do with any temperance party, that I have never expressed
a deare to receive his nomination, smooth allows consequence
are man myself temperance measures. As I am a candidiat for the office of Goroner, of course every one has the privilege of voing for me, and should the anti-Maine I sw temperance party, after this declaration, retain my name on their
ticket, I shall be the last one who will object to it. Most respectfully yours.

Calhoun, Clay and Webster are three names which will long be venerated by American citizens. Of the three, Calhoun, during the early part of his life, was perhaps the greatest resorted by a merican citizens. Of the three, Calhoun, during the sarily part of his life, was perhaps the greatest weight and importance to his opinions to all parties. Of the writings and speeches of American statement, there are carcely any which bear so directly upon the great measures adopted by our government, during the last forty years, as those of the lamented Calhoun. The War, the Revenue System, the Currency, and States Rights, were subjects upon which he took a leading position, and greatly aided the decisions which were made on them. With those who take an interest in our national history the value of the writings of our public men examote to lon highly cedimated.

AFFAIRS AT SEBASTOPOL.

Prince Gortschakoff telegraphs, under date the 23d, September, that the allies had landed 20,000 men at Eupatoria, and had 30,000 on the Russian flank.

On the 22d, the allies attacked the Russian infantry, and the latter retreated to the heights over Rusta.

Another despatch from Gortschakoff, dated the 26th, states that on the previous day 33,000 of the allies had debouched from Eupatoria, and occupied the neighboring villages on the left flank.

villages on the left flank.

Gortschakoff reported on the 17th that the allies had attempted nothing up to that date on the north side, but were concentrating their forces between Balaklava and the Tchernaya, and constantly reconncitreing the left wing of the Russians from the Baidir valley. The loss of the Russians is estimated at eighteen thou-

sand men.

Pespatches from Sebastopol, of the 16th, announce that the Russians were fortifying themselves in the north part, and were constructing new batteries; and that the French were advancing cavalry and a column of infantry

towards Backshi-serai by the Baidir road. Sebastopol is to be razed and the basins filled up.

Letters from the camp mention that the allies were

actively preparing for a campaign.

The correspondent of the Paris Patric, under date of Sept. 26, says:— Sept. 26, says:—

Ever since their retreat the Russians have continued to fire shells at us, and it would be a mistake to suppose that our armies in Sebastopol are beyond the range of the enemy's batteries on the northern shore and on the plateau. The balls from Fort Constantine reach beyond the taxes of the suppose that our armies in Sebastopol are very easily throw their projectiles into the town. As to the batteries of the other forts, some of the guns in them are so powerful that they can carry shot right over the town and do execution in the advanced siege works; but although the Russian fire does not cease it, is not very active. The artillery and engineers in Sebastopol are everywhere at work. Fort St. Nicholas, which was left almost intact, has been fortified, and its cannon already replies to the enemy. Any attempt of the Russians to return to the place is wholly out of the question.

A letter from Berlin, dated the 23d, says:—

Various circumstances at St. Petersburg seem to indi-cate that Prince Gortschakoff will soon evacuate the forts to the north of Sebastopol, those forts being only strategic points; but great preparations are making by the Russians for a winter campaign.

SOFT SHELL CITY CONVENTION.

The Softs turned out in great force, last evening, to attend the convention for the nomination of city officers. The meeting was called to order shortly after 8 o'clock when ex-Alderman Charles Peck, of the Twentieth ward was elected to the chair, and Mesars. I. Harrison and Henry Hilton, of the Fifteenth ward, were appointed secretaries. The peace of the meeting was for some time disturbed at this point by the riotous conduct of a delegate, who was immediately consequent to the station house, his place being readily supplied by an outsider. This indirividual having been attended to, the meeting was again called to drder, and the convention at once proceeded to ballot for Commissioner of Repairs and Supplies. Nomination was had by wards, when William Miner and Nathaniel S. Selah were put in. Ballot was then had, with the following result:—

The decision of the chair being announced, the nomition of Nathaniel S. Selah was declared unanimous, amidst cheers.

Mr. Jous Cocheant then rose, and called attention to the claims of George B. Purser to be nominated for City Inspector. If he was chosen, he would carry the election for the democratic party, and would receive the aid of outside parties. The reform party have given in their adhesion to this man. It was he that when tendered the nomination for Comptroller, declined it, that it might be given to that great man from the democratic ranks, Azarish C. Flagg. To Mr. Furser we owe his election—his efficient services; and now it is proposed to leader him an unexpected nomination, and to insist upon his running for the office.

The convention then by wards nominated Richard Johnson and George H. Furser as candidates, and went into ballot, (Messra, Keunedy, Douglas and Fowler, tellers,) with the following result:—
